**DETAILED ACTION**

Claims 1-10 are pending.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Habib et al. (EP 832 643).

Habif et al. disclose the stabilization of an unstable retinoid in oil-in-water emulsions for skin care compositions. Exemplified is a composition comprising 3% butylene glycol-1,3 (humectant), xanthan gum (polymeric emulsifier), stearic acid (crystalline fatty acid), isostearyl palmitate (fluid oil), dimethicone (volatile silicone), linoleamide (retinoid booster) and 0.29% retinol. The compositions of the invention preferably have a half-lifetime of from 20-45 days at 50 C. See pg. 5, lines 28-29; Example 1.

While the reference does not explicitly state the solubility of retinol in the fluid oil, the Examiner respectfully points out a compound and its properties are inseparable (In re Papesch, 315 F.2d 381, 137 USPQ 43 (CCPA 1963)). Thus, since Habib et al. teach the same retinol in the same fluid oil as that recited in the instant invention, the retinol of Habib et al. must have the same solubility in the fluid oil as that of the instant invention.
